The Carolinas Chapter

2021 SPRING CONFERENCE

April 29, 2021

Artificial Intelligence (AI) has become present in so many elements of our daily lives (some known, but in many cases unbeknownst) serving society in myriad ways while at the same time astonishing and alarming us. AI has already fulfilled use cases where the technology helps us build machines, grow food, and cure diseases. On the other hand, AI clearly can threaten our privacy, create deep fake images, and control weapons of war. We have reached the point where to ensure the path we are going down leads to utopia and not dystopia, AI demands a humanity inspired balancing act – hence the dawn of a new discipline – AI Ethics.

Presenters

Bill Kleyman is a very dynamic and effective speaker and presenter. He has a passion for technology, being well educated on the trends and direction technology is headed. His ability to understand technology and apply it to the business world is a much needed skill in our industry.

Wil Spagnoli is an Artificial Intelligence Developer with a focus on Deep Neural Networks. He is an enthusiastic supporter of the ethical applications of AI with ongoing projects in energy optimization and autonomous drug design and will be discussing, future ethical applications for AI, ethical risks, and what the industry is doing to overcome these challenges.

Neil Sahota an IBM Master Inventor, United Nations A.I. Advisor, professor at UC Irvine, and globally-recognized speaker and author. Neil is a founding member of the UN's Artificial Intelligence for Social Good Committee, and he's here to talk about how we can harness the power of AI and use it for social good.
